

All forms of Silver ownership were NOT created equal. Earn a GUARANTEED 2% a year above the current Silver price on your holdings.

So you've made the decision to diversify your portfolio to include Silver and that decision has paid off handsomely. Now what?

If you have owned Silver since 2006, you have experienced exceptional returns, but long term ownership of precious metals presents unique challenges.

- As the value of precious metals increases, so do your holdings – but you would have to sell those assets in order to realize the gain.
- A small deceleration in the meteoric rise in price of precious metals, a period of flat prices or even short term declines in price can quickly erode your superior returns for the past ten years.

Would you buy an apartment building and then NOT rent out the apartments? *Didn't think so.*

What if, as an owner of precious metals, you could maximize your potential return by lending your holdings to the market in exchange for a guaranteed income stream?

See www.afmetals.com/PMdLP

How would you like to retain full ownership of your precious metals and maximize your potential return on that investment by lending your holdings to the market in exchange for a guaranteed income stream on top of any gains or losses that you realize from owning the metal?

The Alliance Precious Metals Deposit Lease Program (PMdLP) allows you to retain full ownership of your Silver while generating a minimum of 2% per year in Lease Fee income above any gain or loss you may realize from owning precious metals. ***You could earn a guaranteed return on your Silver of \$0.337 per Troy Ounce or more per year****

Compound that \$0.337/TOZ over a 10-year holding period and – regardless of whether the price of your Silver goes up, down or stays flat – you could realized up to an extra \$4.45 per Troy Ounce in Lease Fee Income. That is almost 27% in Excess Real Returns compared to London Silver and almost 35% in Excess Real Returns compared to the SLV-ETF on the value of your holdings since April 2006**. Should Silver resume its meteoric price rise Lease Fees earned from your PMdLP Investment can provide you with additional income on top of the profits you would realize from owning Silver. Should the price of Silver drop, your PMdLP Lease Fee Income can offset some or all of your market losses from a price decline!
